EDUCATION

Rutgers, The State University of New Jersey *New Brunswick, NJ* May 2026
Bachelor of Science, Business Analytics & Information Technology — *Cum Laude* GPA 3.6/4.0

WORK EXPERIENCE

Apple, Inc *Cupertino, CA*

Software Engineer Intern, Face ID Process Automation June 2026 – Present

- Build and maintain a CI test stage that replays recorded sessions end to end on every pull request (90+ builds/ week), catching regressions a compile check misses without blocking merges.
- Use Claude Code with written project context and reusable skills to accelerate scripting, log analysis, and CI debugging, verifying every output against real test runs.
- Create 16 automated test scenarios across multiple hardware configurations and write 5 new automated checks, merging each into the team's main codebase.
- Extend the test-data conversion tooling to support a new hardware configuration, unblocking CI coverage for it.
- Write Python and Shell/Bash scripts that classify test outcomes from diagnostic logs, replacing manual log review with automated pass/fail results and archived output for engineering review.
- Isolate root causes by tracing decision logic in verbose logs and confirming expected criteria with teammates.

Technical Specialist *Edison, NJ* August 2025 – Present

- Troubleshoot hardware and software issues for 50+ customers per week across iOS, watchOS, tvOS, and visionOS, with a 92% customer satisfaction rate and a 100% same-unit repair rate (SUR), exceeding performance expectations for the full year.
- Complete 4.6 appointments per hour while maintaining quality, staying fast and efficient during high-traffic periods and multiple concurrent reservations.
- Use diagnostic tools to identify recurring issues and build workflows that speed up resolution; support product launches, translate technical concepts into clear guidance, and quickly adopt new AI-driven tools.

Product Specialist August 2024 – August 2025

- Track user interactions in CRM platforms and adjust recommendations from data insights, delivering product demonstrations that clarify features and contribute to increased feature adoption.
- Attach AppleCare to 75% of eligible customer visits, pairing the right protection plan with each customer's device and needs.

Prime Shipping, LLC *Hillside, NJ* December 2023 – August 2024

Business Operations & Data Intern

- Manage 100+ invoices and inventory entries in Excel (VLOOKUPs, pivot tables) and Power BI and review shipping logs for discrepancies, keeping datasets clean and improving inventory accuracy for logistics teams.

PROJECTS

Selenium + TestNG UI Test Framework github.com/kayla-damoah/selenium-testng-framework

- Built a Java 17 browser test suite with Selenium, TestNG and Maven (Page Object Model, data-driven tests) that runs headless on every push in GitHub Actions and publishes an Allure report.
- Took the suite from 9 to 12 of 12 passing on CI by reading logs and failure screenshots, then making each click and keystroke verify its own result.

Playwright + pytest Test Framework github.com/kayla-damoah/playwright-pytest-framework

- Built a Python framework with pytest and Playwright: 12 browser tests and 10 REST API tests using page objects, fixtures and markers, run on every push in GitHub Actions with a published Allure report.

Athletic Equipment Inventory Optimization github.com/kayla-damoah/track-inventory-optimization

- Built a Python model and interactive dashboard for Rutgers Track & Field from the team's baseline budget and roster, projecting $8K (19%) in annual savings and 40% fewer emergency orders.

SKILLS

Test & Automation: Test automation framework design, Selenium, Playwright, pytest, TestNG, REST API testing, CI/CD (Jenkins, GitHub Actions), test plan authoring, software QA methodologies, SDLC, failure triage and root cause isolation, log analysis
Languages & Tools: Python, Java, C++, Shell/Bash, SQL, R, Xcode, Git, Agentic AI tooling (Claude Code)
Data & ML: On-device ML and sensor algorithm evaluation, predictive modeling, statistical analysis, Power BI, Excel
Certifications: Google Python Automation Professional Certificate

LEADERSHIP EXPERIENCE

Scarlet Divas Executive Board — *Secretary and Treasurer* August 2024 – May 2026
TWESE Executive Board — *Secretary* August 2024 – May 2026
Rutgers Track & Field — *Manager* September 2024 – December 2025
